

INSIGHTS

Vrinda Store has a strong fulfillment rate (92% delivered) and a loyal core customer base, but sales are concentrated in a few regions/channels and have declined through the year.

- **Sales dip (Mar→Dec, ~16% drop):** Identify what drove the March peak and repeat it around Q4 with a festive campaign.
- **Regional gap:** Bengaluru (₹1.77M) outsells Mumbai/Chennai (₹0.92M each) by ~2x — boost marketing/logistics in weaker top-5 cities.
- **Core segment:** Adult women drive ~42% of sales — keep product and marketing focused here, while testing growth in Teen/Senior segments.
- **Channel focus:** Amazon, Myntra, and Flipkart make up 80% of sales — prioritize these; reassess investment in low-share channels (Meesho, Nalli).
- **Returns (8% total):** Healthy, but breaking it down by category/state could uncover fixable issues.
